SUMMARY

Frontend developer building production web apps across healthcare, e-commerce, hospitality, and creative-tech. Core stack is React/TypeScript, Tailwind CSS, and Supabase. Comfortable owning a feature end-to-end — from component architecture to diagnosing production auth bugs. Currently completing a B.Sc. in Mathematics while building a browser-based, multi-model AI chat platform as a final year project.

EXPERIENCE

Front-End AI Engineer Intern — [FlyRank](#)

2025 – Present • Remote

- Building and shipping frontend features for AI-powered products using React and TypeScript
- Collaborating with engineers to integrate AI/LLM-driven functionality into user-facing interfaces

Frontend Developer — [Medixc](#)

2025 – Present • Lagos, Nigeria

- Built and maintain the patient-facing web app for Medixc.app, a healthcare platform offering online consultations, health record management, and medication reminders
- Improved patient engagement by streamlining appointment booking and medical record access
- Enhanced data visualization for healthcare professionals to track patient progress, and reduced no-shows through better appointment scheduling flows

Frontend Web Developer — [CrudPen Technologies Limited](#)

2023 – 06/2024 • Yenagoa, Bayelsa

- Built Pneuma Travels, a travel agency web app, using HTML, Tailwind CSS, and vanilla JavaScript
- Collaborated closely with backend developers to integrate live data across the app, coordinating scope and delivery across the team

Asst. Frontend Web Dev Lead — [Google Developer Student Club \(GDSC\), Federal University Otuoke](#)

2023 – 2024

- Co-led frontend-focused workshops and project collaborations for the university's GDSC chapter, helping student developers ship real projects

SELECTED PROJECTS

FaceForge Studio — Browser-based 2D VTubing / facial motion capture

React 19, TypeScript, Vite, MediaPipe, WebGL

- Built a client-side app that tracks facial landmarks via webcam and maps expressions onto a 2D avatar in real time using WebGL-based image warping
- Refactored a 900+ line monolithic component into a modular architecture — moved ML inference to a Web Worker and built a dedicated renderer with adaptive resolution scaling and frame skipping — eliminating main-thread stuttering

NexMart — E-commerce platform (team project)

React, Zustand, staged on Render

- Diagnosed a cross-origin cookie (SameSite) bug causing production-only authentication failures

- Refactored the cart flow to an API-first pattern and built out the seller dashboard: product management, payouts, wallet ledger, order flow, and shipping zones

NEXUS AI — B.Sc. final year project

Multi-model AI chat platform: GPT-4o, Claude 3.5, Gemini 1.5 Pro

- Built a fully in-browser, backend-free chat platform integrating DALL-E 3 image generation, Judge0 code execution, Serper search, and text-to-speech
- Designed custom model-routing and intent-classification logic to select the right model per query

Globe Tech Community — Public member directory for tech professionals

TanStack Start (SSR), Supabase · [globe-tech-hub.vercel.app](#)

- Built a public directory with one-way follows and conversion-focused onboarding for guest visitors
- Resolved a Vercel deployment architecture mismatch between Nitro/TanStack Start and the default Vite preset

TFI E-Learning Platform — Self-initiated pitch/prototype

Next.js, Supabase, Tailwind CSS

- Designed a full data model (profiles, courses, cohorts, enrollments, progress) with role-based RLS policies across three user roles
- Delivered a working prototype and brand system as part of a platform pitch to The Fort Institute

The House Studios — Production studio booking site

Next.js, Supabase, Tailwind CSS · [thehousestudioshq.com](#)

- Built the frontend for a Lagos production studio's marketing and booking site, showcasing cyclorama, podcast, recording, and live-streaming spaces for creators and brands

NewLabel — Online learning platform

Next.js, Supabase, Tailwind CSS · [newlabel-hub.vercel.app](#)

- Built course creation, video streaming, and certification flows with secure authentication and progress tracking

EDUCATION

Bachelor of Mathematics

Federal University Otuoke · 2020 – 2024

CERTIFICATIONS

Certified in Frontend Web Development, Level 3 — Computer Professionals Registration Council of Nigeria

Issued January 2026

MERN Stack — Simplilearn

Issued November 2025

Certificate in Leadership Development — The Fort Institute (TFI)

Issued June 2026

SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, React Native, Next.js, Astro

Styling: Tailwind CSS, SCSS, Bootstrap

Backend / Data: Supabase

Tools: Git & GitHub, VS Code, Figma, Chrome DevTools, npm/yarn, Vite, Webpack, Postman
